Description: Mentorship Program

Do you love to share what you know but do not want to worry about the test at the end?

*Or, are you a student who would like the opportunity to ask for guidance
from someone who has been there and done that?*

*Or, do you have an idea of what you would like to do but
have no idea of how to accomplish it?*

The purpose of the ASA Mentorship Program is to provide a place where knowledge can be shared to benefit all those involved and take our profession to the next level. It is a traditional mentorship program where rapport, structure and follow up form the base. As everyone learns in orientation, in order for mentorship programs to work and be sustainable - rapport, structure and follow up are necessary. It is open to all ASA members (i.e. all students and acupuncturists who are also members of an ASA member state association).

If you are interested and/or have questions, please contact Christine Cronin at secretary@asacu.org
